Profile

I am a motivated Junior Frontend Developer with 1 year of hands on experience building responsive and user friendly web interfaces using HTML, CSS, JavaScript, Tailwind CSS, and React. Strong foundation in structured problem solving and version control with Git and GitHub. Originally trained in Integrated Science, bringing analytical thinking, adaptability, and a strong learning mindset to tech. I am passionate about writing clean code, improving UI/UX, and contributing to the digital world. Actively seeking a Junior Developer role to grow technical skills and add value to a dynamic development team.

Professional Experience

Feb 2025 – 03/2025

Capstone project

Developed key functionalities including Add Expense, Delete Expense, View Expense Summary, and Reset Data using HTML, CSS, and JavaScript.

Improved user experience by making the interface 70% more intuitive and responsive across mobile, tablet, and desktop devices.

Collaborated with team members to integrate UI/UX design with functional components.

Conducted testing and debugging to ensure 95% functionality and error free operations

Education

2021 – 11/2025

Enugu, Nigeria

Bachelor of integrated science

University of Nigeria Nsuka

B.S.C Integrated Science

I developed a strong foundation in scientific inquiry, analytical thinking, and problem solving. I gained experience in research, practical experimentation, and clear communication of complex concepts skills, that support logical reasoning and structured project execution as a developer.

Skills

Html, Css, Javascript, Tailwind, React,
Git, GitHub.

• English

• Igbo

Certificates

frontend certificate [↗](#)

Completed She Code Academy program, learning HTML, CSS, JavaScript, and React. Gained hands-on experience building interactive web projects.

Level 2

Projects

Travel to space [↗](#)

The Space Tourism Multi Page Website is a responsive website project that showcases a fictional space travel service. It includes Home, Destination, Crew, and Technology pages, each with interactive tabs to display content like planet info, crew bios, and spacecraft technologies. The project focuses on responsive design, CSS layouts, hover states, and JavaScript for dynamic content.

Recipe App [↗](#)

This project is a Recipe Finder App that allows users to search for recipes and filter them based on maximum cooking time, making meal planning fast and convenient. It leverages a public recipe API to fetch data.

Tools used are react + css

Dessert [↗](#)

This project enables users to add items to a cart, remove items, confirm orders, and start new orders. It is fully functional and built using HTML, CSS, and JavaScript, demonstrating fundamental web development and interactive UI skills.

Awards

Award of Achievement

She code academy

My group was awarded first place in the capstone project, recognized as the top-performing team among all participating groups.
